## Carobbio Srl from Bergamo celebrate his 60th anniversary

To celebrate his 60th anniversary, Carobbio Srl, one of the most important sub contractor in Bergamo Area organized an Open House in his building. At this event, major customers and suppliers were invited together with some politicians and several industrials. All three generations of the Carobbio family participated to this event: the founder Giovanni, his son Alberto and the grandson Lorenzo.

*Mr Giovanni Carobbio and Luca Moia*

Amada was invited as institutional supplier because we have collaborated for over twenty years. During the tour of the company, all the new technologies have been shown and great attention and emphasis were given to the latest acquired system: the AMADA ENSIS with ASF-EU automation.

The stage from which were made the speeches was located right next to the ENSIS and, in addition to the speeches of Giovanni, Alberto and Lorenzo, Luca Moia, our sales manager, was invited to explain to the participants the twenty years long partnership between Amada and the company Carobbio. At the end Luca, on behalf of Amada, gave a commemorative plaque which we prepared for the customer.

A very emotional moment was when employees have given to the founder Mr. Giovanni, an Edelweiss (symbol of the military corps of the Alpini of which John was a member) cutted in real time with our laser cutting machine Ensis and assembled in a few minutes.

*Mrs and Mr Giovanni*

*The Giovanni family*

The atmosphere of cooperation and trust, and the consideration that this customer has towards us is evidence that Amada doesn't want to be just a supplier of technology ... but a partner of success and growth for its customers.

*Commemorative plaque*
